High Resolution Video Glasses Allow You to See what the Camera Sees

Wireless Video Base Station with Quad Diversity Wireless Video Receiver

GPS Position Hold Allows the Draganflyer X6 Helicopter to be Flown Hands-Free

Draganflyer X6 RTF Thermal Infrared Video System with GPS Position Hold

The Draganflyer X6 helicopter with thermal infrared video camera is a powerful aerial video tool. Locate individuals based on body heat for tracking or search and rescue. Find people hidden in tall buildings by their thermal signature. Real-time video is transmitted over a 5.8GHz wireless connection, and can be captured by a recording device connected to the base station and/or handheld controller.
